

Dubai

"Another World"

¿Remember this?
Yes, yes it is the little hotel in
Dubai.

BURJ
AL ARAB

Jumeirah

**This is the Burj Al Arab, the only 7 stars hotel
in the world, it was built in only 18 months...
And opened its doors in 2003.....**

This hotel is in Dubai, in the Arab Emirates. Yes, a lot of oil and a lot of money....

Just to go in and “see it” costs 60 € .
Can you imagine what it would cost to
spend the night?.....

... In a little room like this one....

Or this one....

Let me tell you: you can enjoy one night in a luxury suite from \$7,500 to \$15,000 the most expensive...

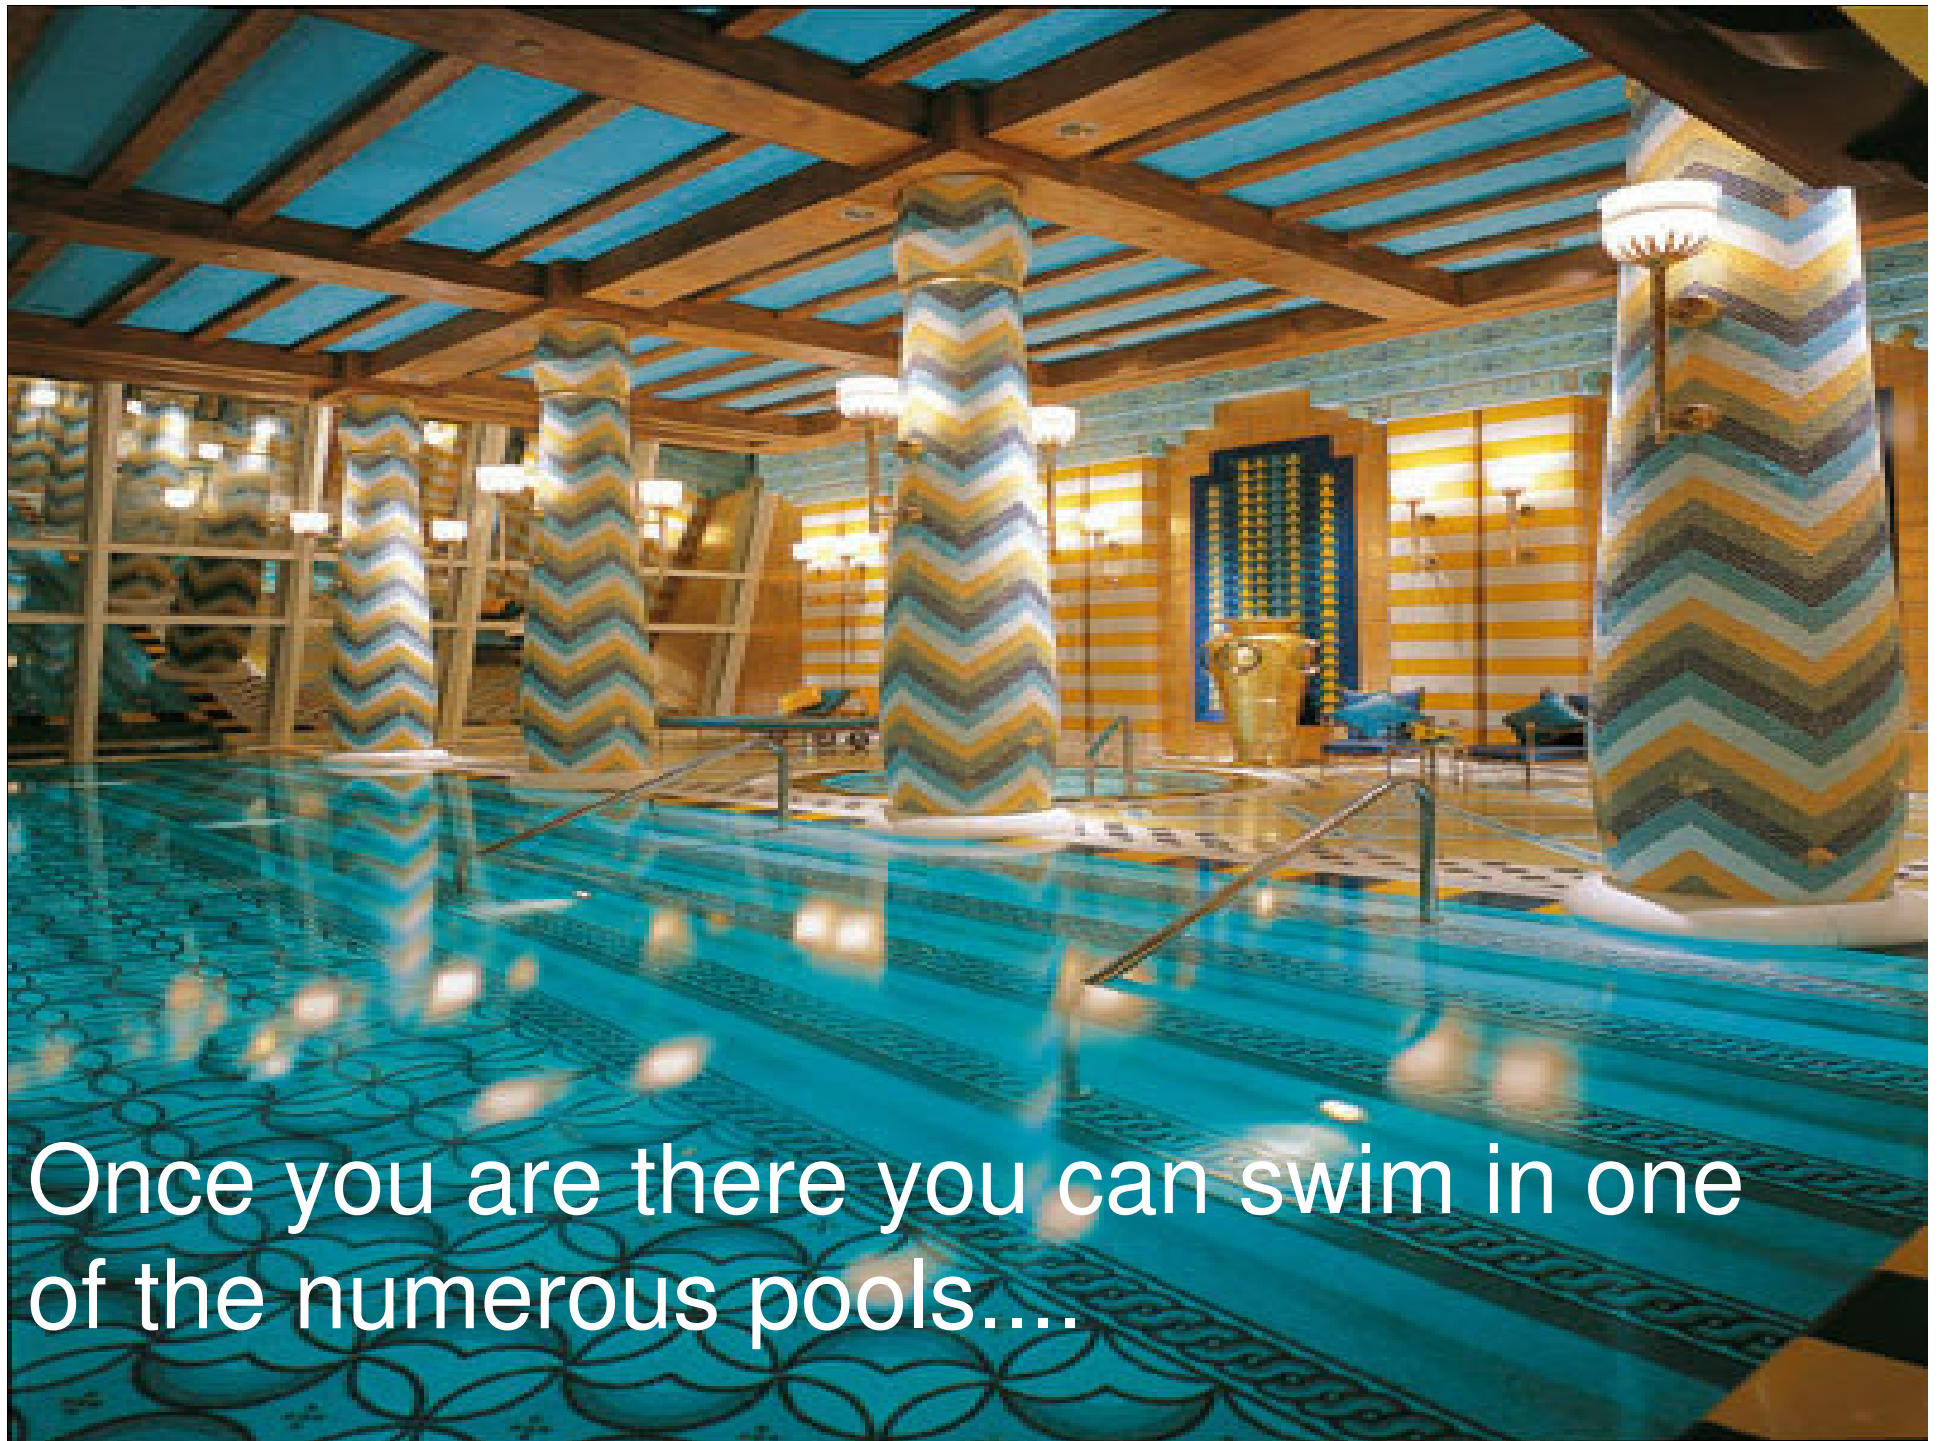

This is the panoramic suite
for \$ 8.250 the night...

You need to add what it will cost you
to dine in this restaurant

Once you are there you can swim in one of the numerous pools....

Or perhaps take a bath in something more “simple” and intimate...

You can have a drink in
one the numerous bars...

.... and be always in a “meeting” ...

... or play a tennis match with Nadal...

Crazy isn't it? And who will worry if you lost a ball?.... For the price of one hour of court you can buy hundreds of balls...

And take a look at the “Indoor Winter Season”
You can ski down the slope while
everyone else is outside in an 85° F...
Yes it is also in Dubai

It was like this a couple of years ago...

And now... finished, How do you like it?,
colossal, isn't it?...

(look at the size of the palm trees...)

My friends... We are seeing the city with the biggest growing rate in the world...

Would you like to see some of the immediate future projects?... Take a tissue to clean your drooling....

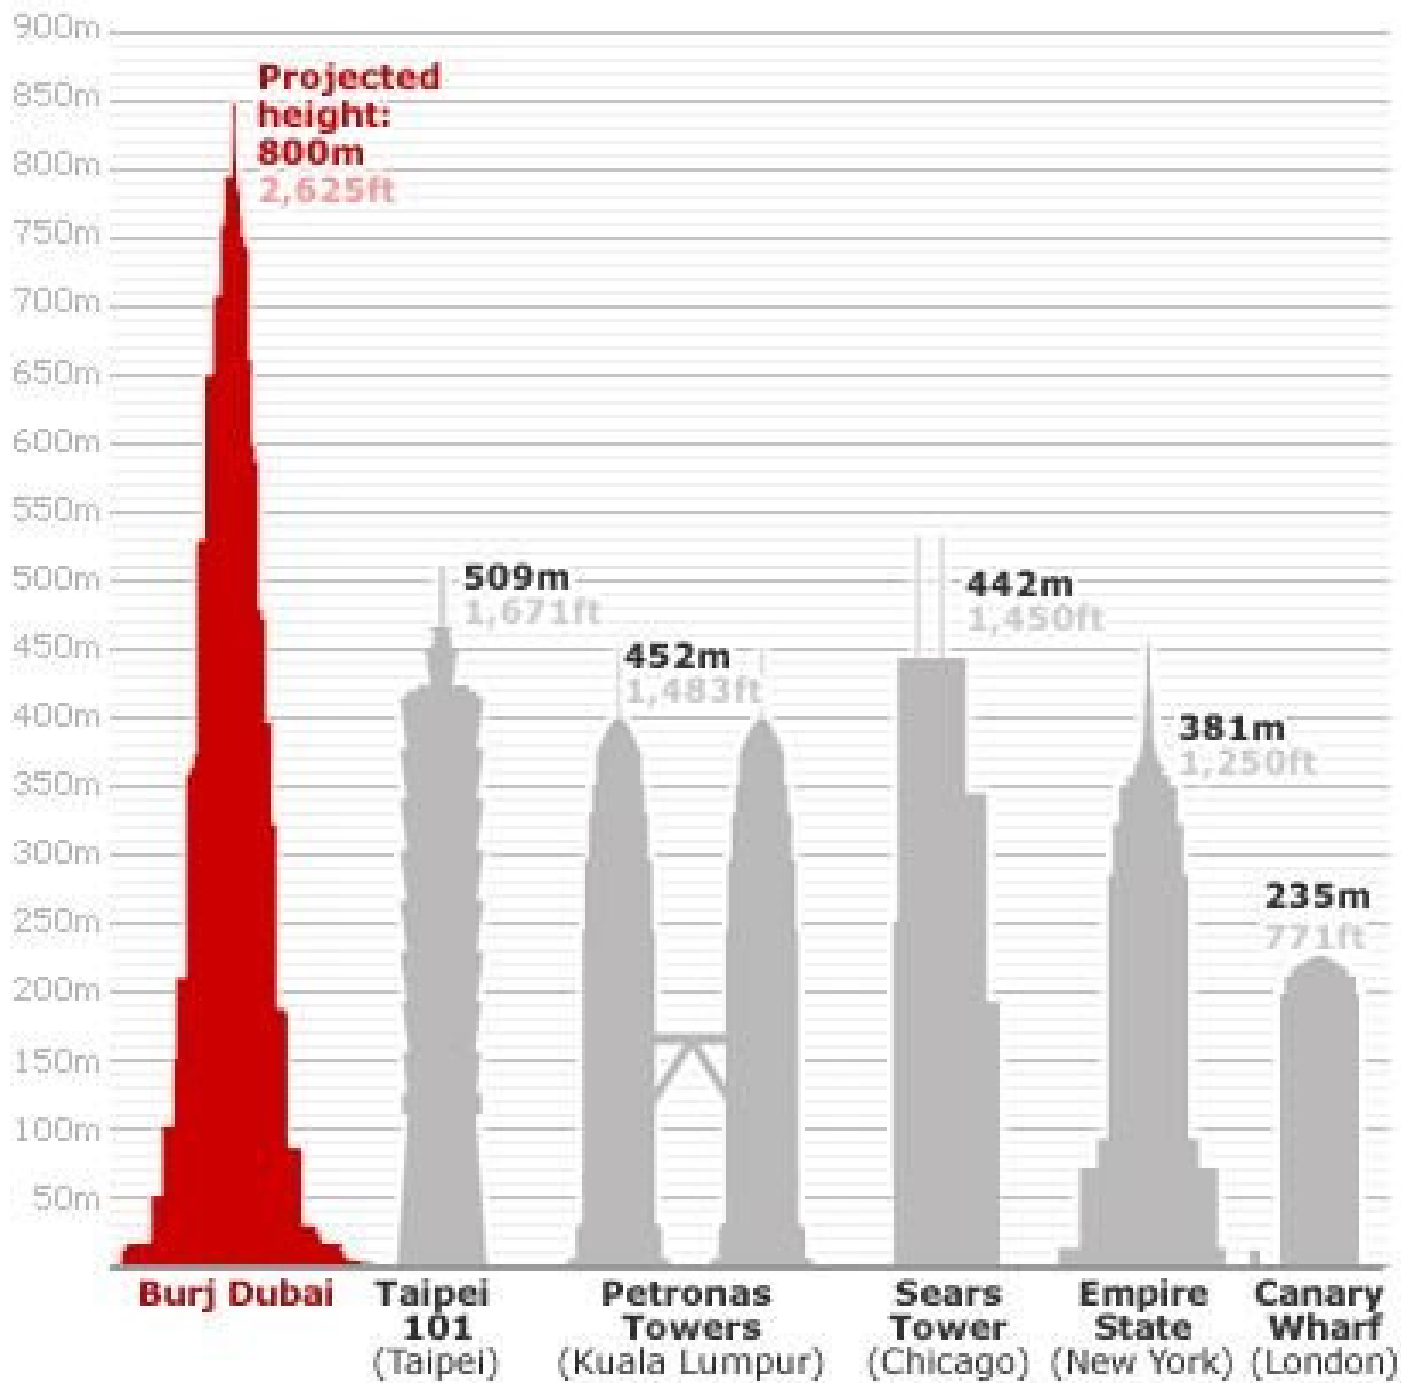

15% of the large towers being built in the world are in Dubai... Can you imagine the problem in operating these cranes

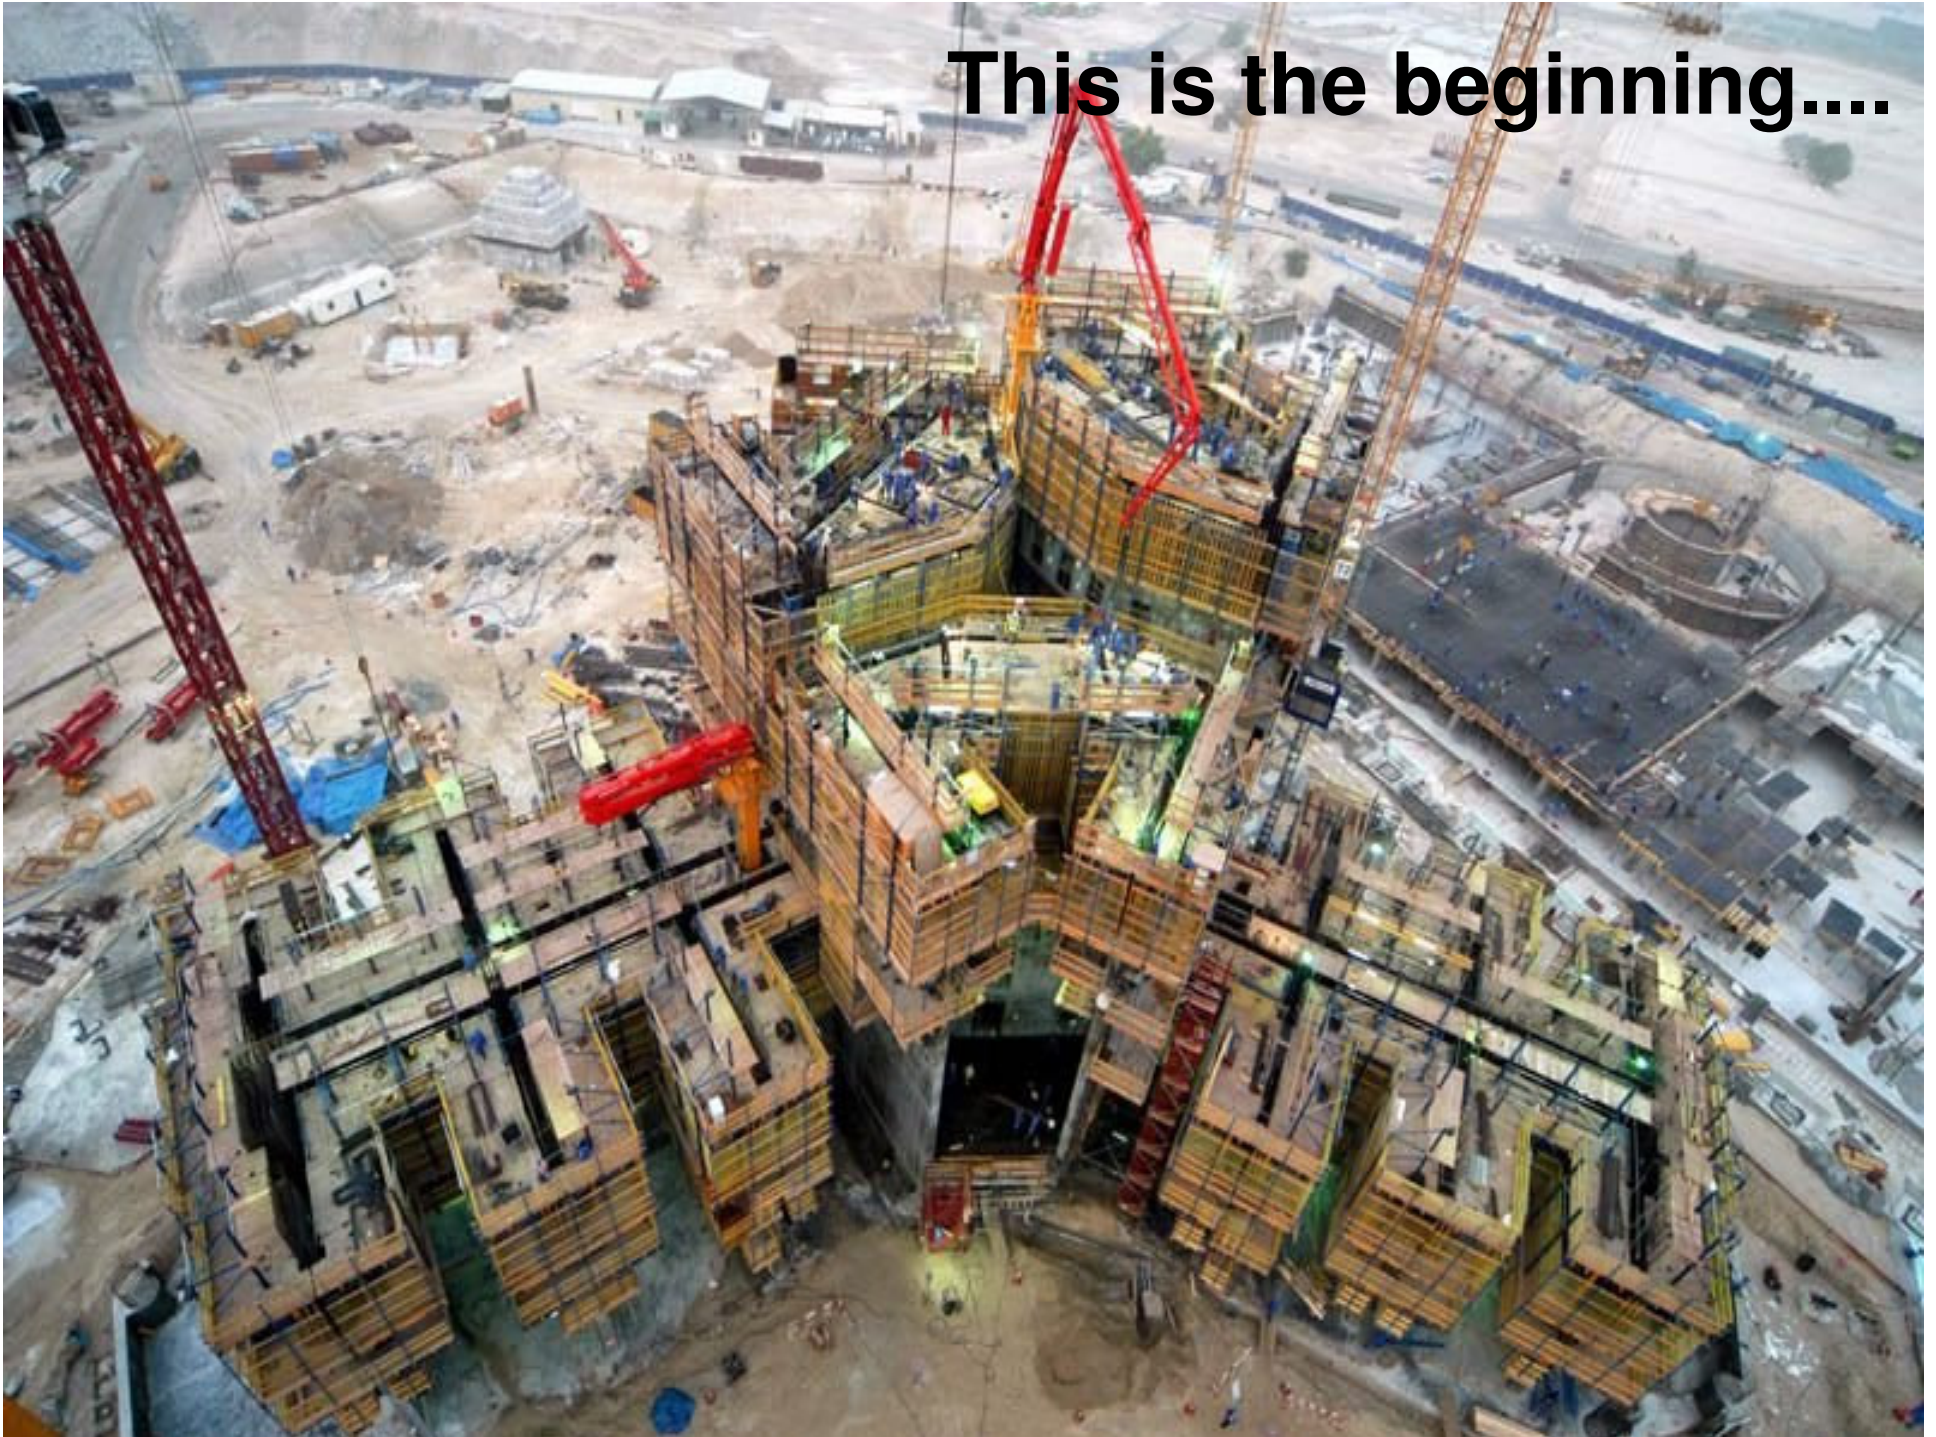

This is a “virtual model” of the Burj Tower

In 2008, it will be the tallest in the world.

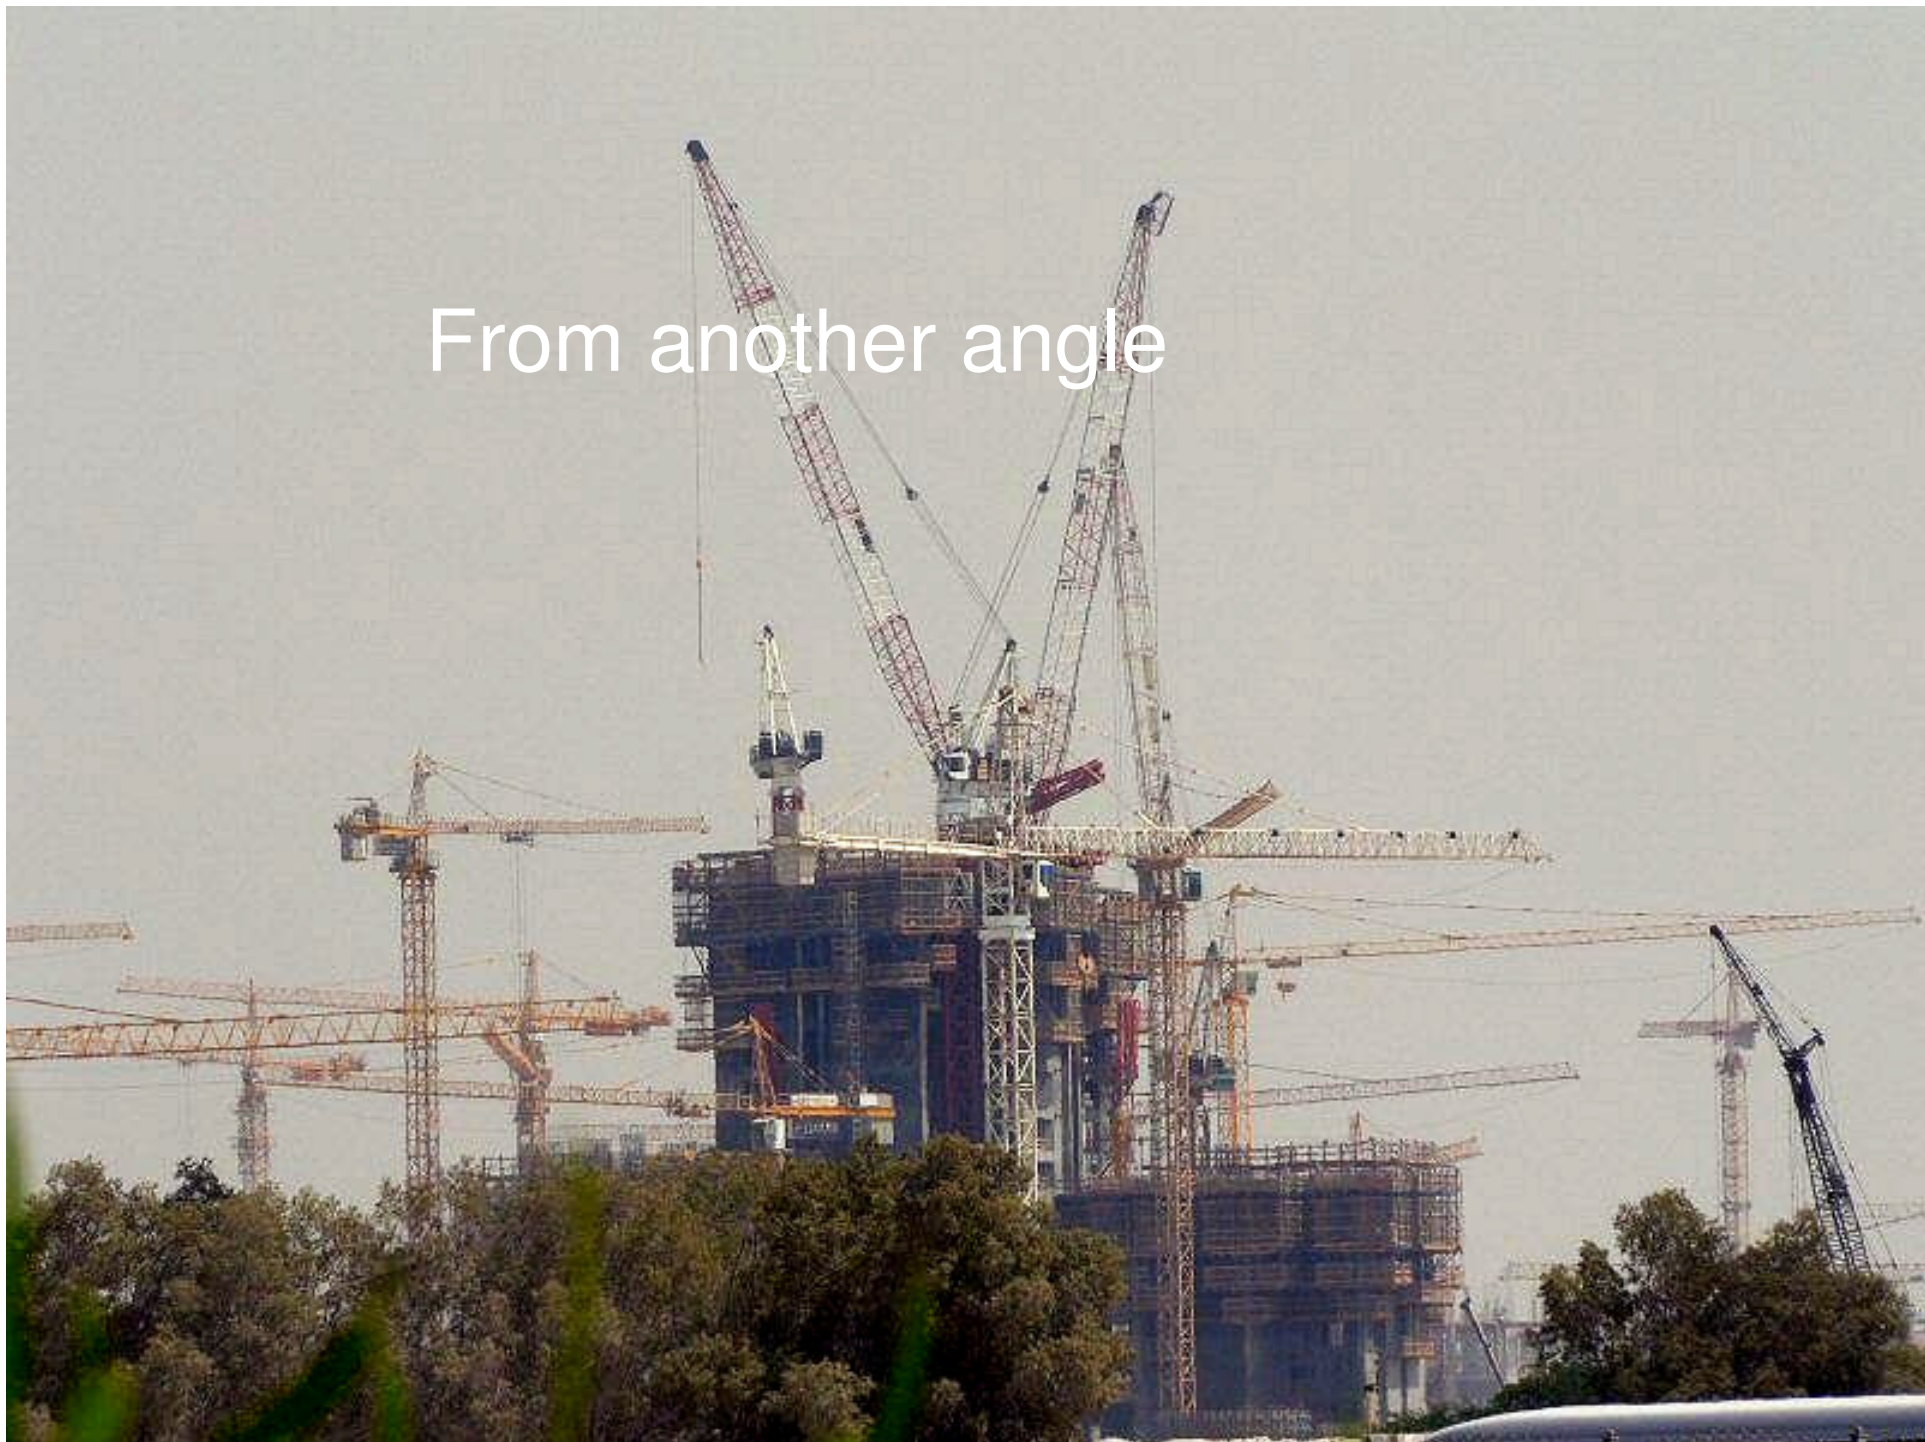

This is the beginning....

From another angle

This is the
biggest theme
park in the
world and it
will be finished
in 2009
“Dubailand”

We will see dinosaurs in true size...

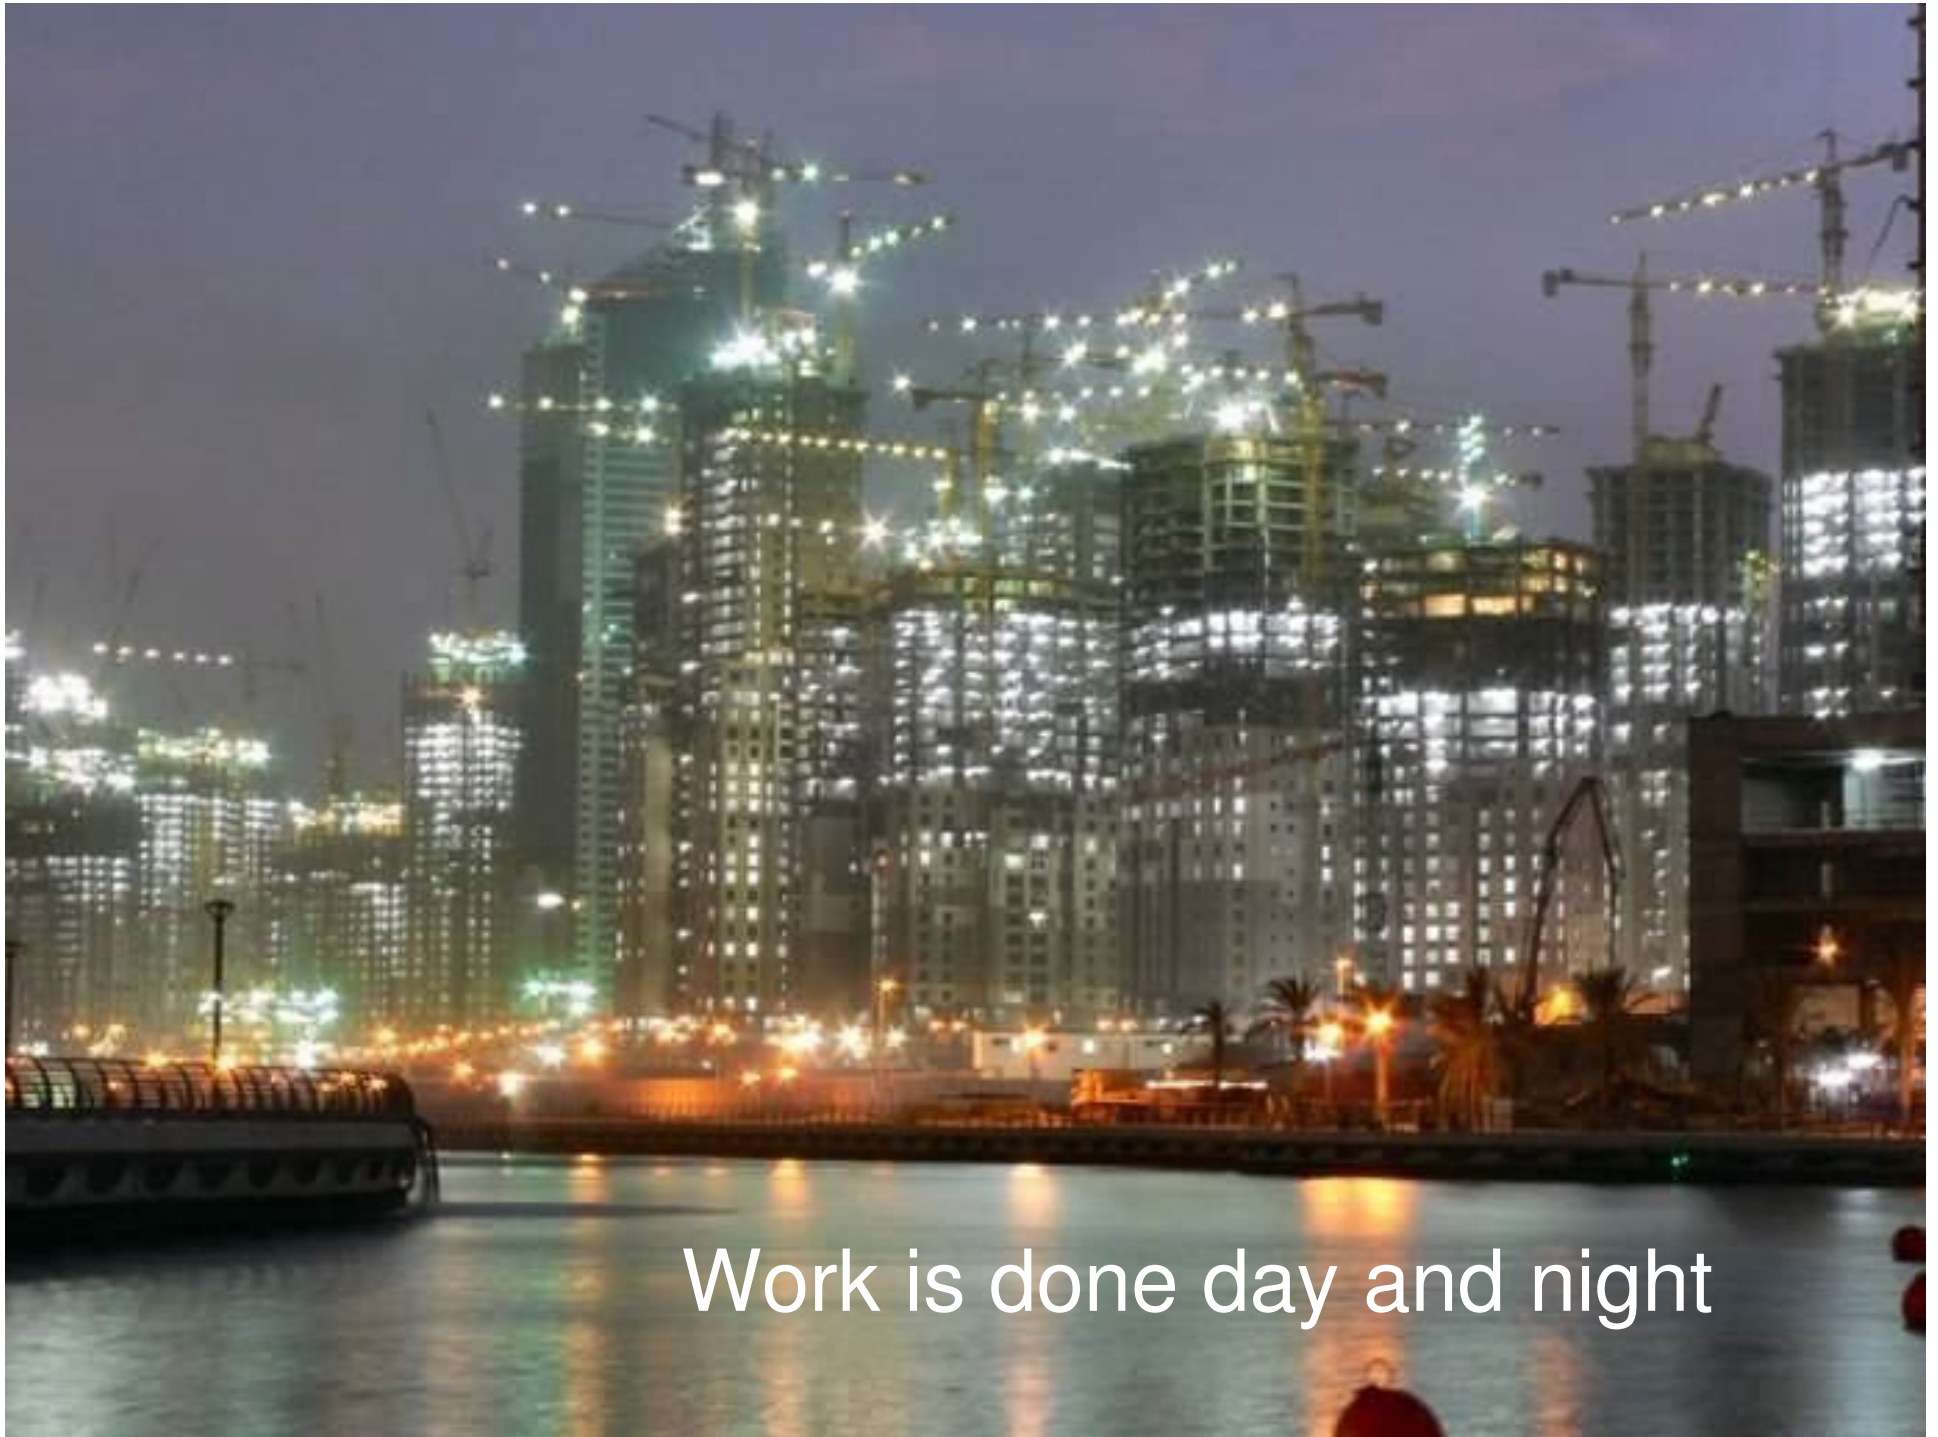

دبي لاند
Dubailand

This is the Residential Jumeirah Beach
40 blocks of buildings

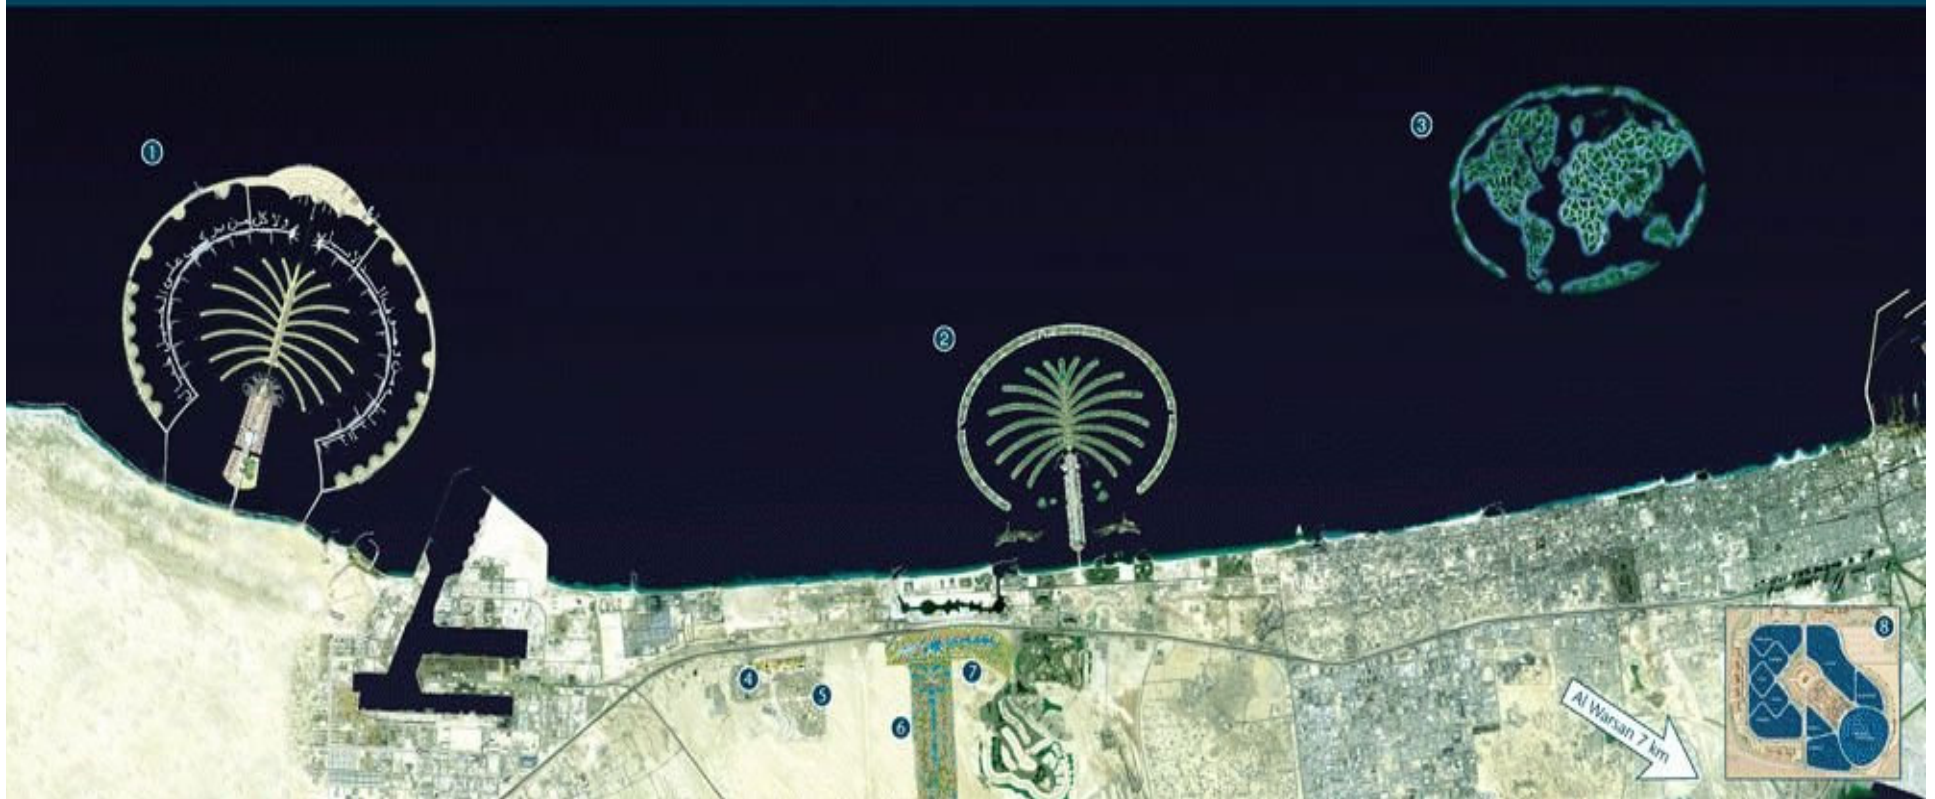

Work is done day and night

This is a drawing with the development of the “Marina Dubai” zone

1. La Palmera Jebel Alí
2. La Palmera Jumeirah
3. “El Mundo”
4. Zona Comercial
5. “Los jardines de Alá”
6. “Las Islas Jumeirah”
7. Torres del Lago Jumeirah
8. Ciudad Internacional de Dubai

The “Jumeirah Palm” is the “smallest” palm”
we saw in the drawing...

**These are the homes in the leaf of
the palm**

This is an aerial view from the plane Look at the Hotel Burj Al Arab

Aerial view of the Jumeirah zone.....

This is the trunk of the palm

This is “The World”: Imitating a world map, the group of islands only costs USA\$7 millions.

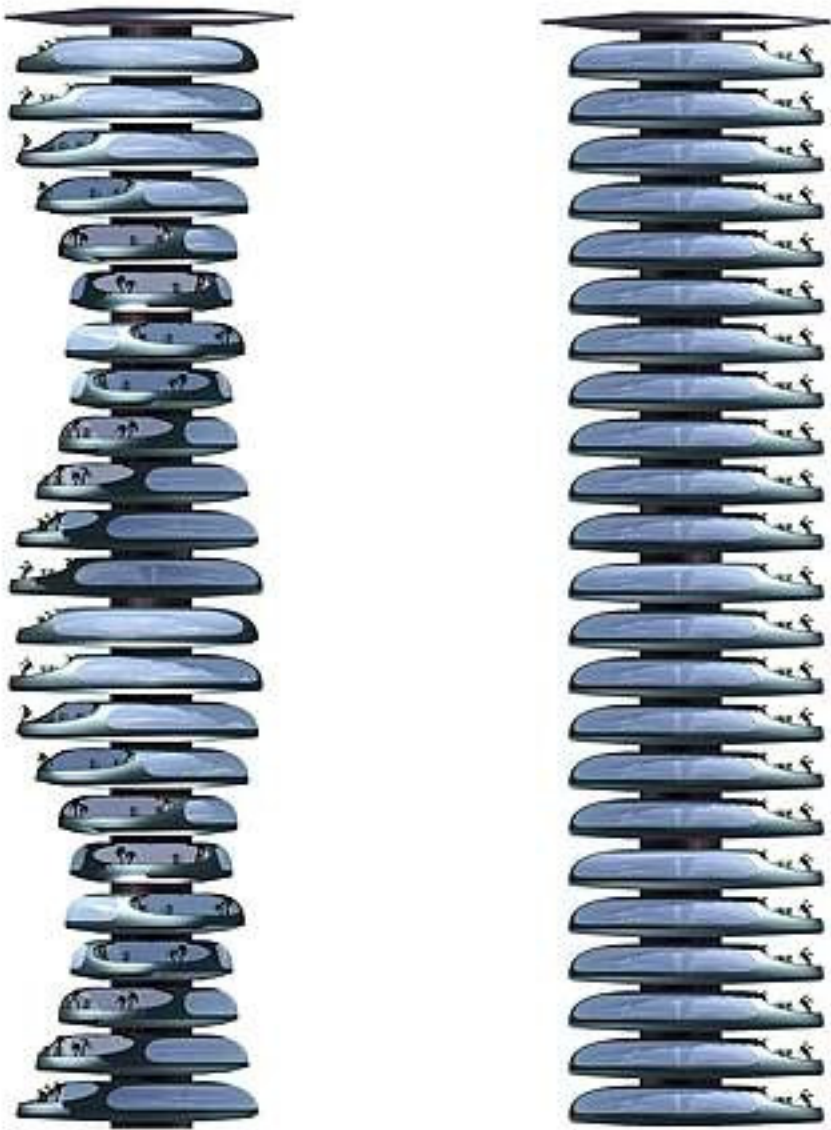

Note: To go to your private island you need a helicopter or a boat.

T E N REAL ESTATE

This is how it was
done.....

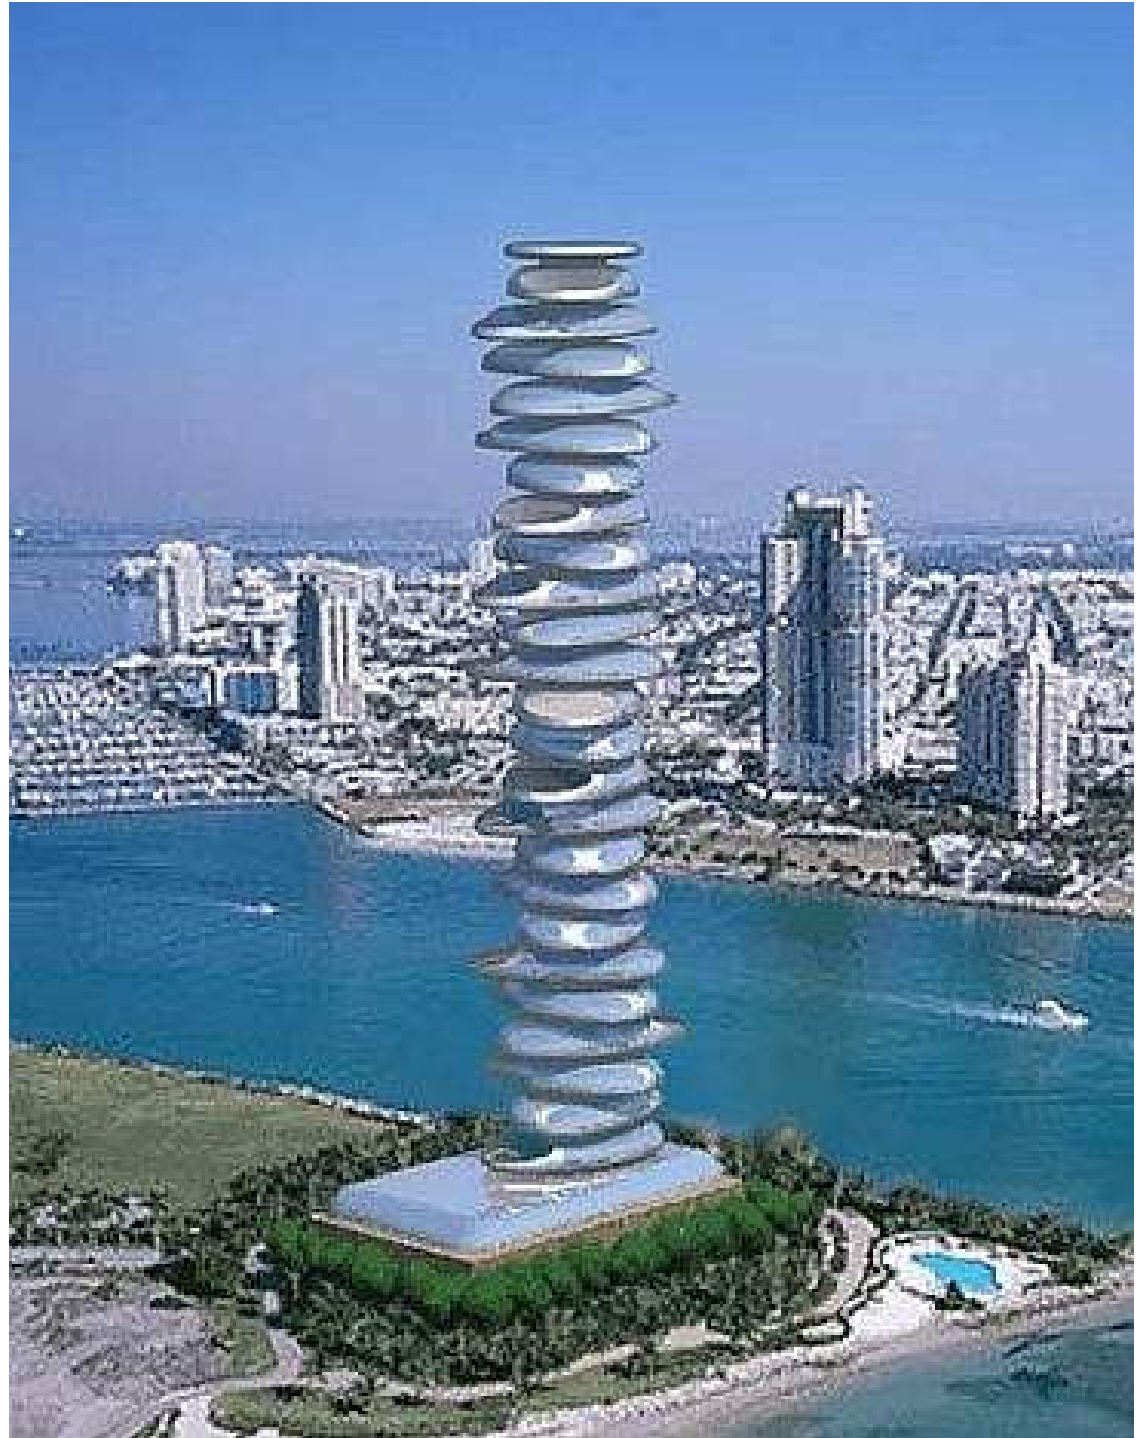

Finally, take a look
at this rotating
skyscraper....

This tower has a height of 250 meters and 59 floors mounted in a concrete core which will serve as a rotating shaft. The floors will be pre-assembled and then attached to the core of the building.

Each floor will rotate separate from the others. The velocity will be slow and not noticed by the residents.

The tower will have solar and aeolian electric system generators to be self-sufficient.

The project is Italian and has not begun yet. It is predicted that its construction, will last two and a half years.

The projected cost will be around 500 million dollars.

The END

That's all folks
